Calculation policy

Updated September 2024

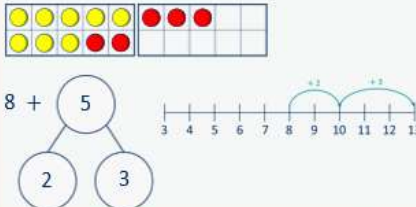

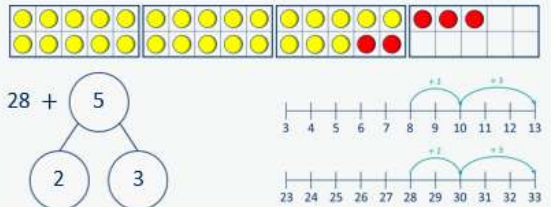

Guidance for teachers

The calculation policy is divided into four sections: addition, subtraction, multiplication and division. At the start of each section, you will find an overview of the progression of skills. Calculations involving decimal numbers and fractions are included.

The calculation policy follows the same concrete, pictorial, abstract approach as our main schemes of learning. Where appropriate, sentence stems and key questions are included alongside the key representations.

Where skills are divided into more than one section across the page, there is a progression in the level of difficulty from left to right.

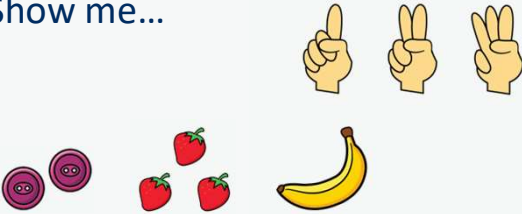

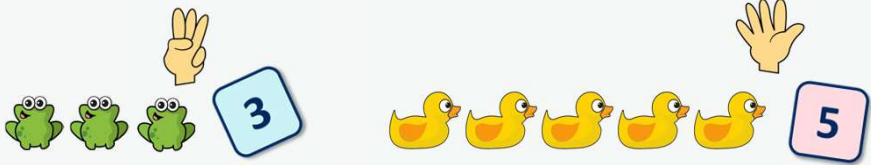

For example, when adding across a 10, children need to be able to add across 10 itself, before making links with related facts.

| | | |
|--|--|--|
| <p>Add across a 10</p> <p>Partition the number you are adding to make a full ten.</p> | <p>... can be partitioned into ... and ...</p>  | <p>I add ... to get to ... then I add ...</p> <p>$8 + 5 = 13$ $28 + 5 = 33$</p>  |
